OUR CORE VALUE

Protecting digital assets

We protect information against a wide range of threats to ensure business continuity and reduce operational risk. We complement each organization's own resources with professional security services, so its systems stay available, secure and reliable.

WHO WE ARE

Cybersecurity and IT governance consulting

B&SiT (Business & Security Information Technology) is a cybersecurity and IT governance consulting firm based in Buenos Aires, Argentina. It provides a managed SOC, penetration testing, ISO 27001, BCRA and CNV compliance, risk analysis and business continuity planning to banks, fintech companies, manufacturers, energy producers and public agencies.

Certified partners on every engagement

B&SiT's partners trained in information systems consulting and audit at PwC and take part in every project. The team holds CISSP, CISA, CISM, ISO/IEC 27001 Lead Auditor and SAP Security certifications.

Local regulation, international standards

We know what the Central Bank of Argentina (BCRA Communication "A" 7724), the CNV, data protection law 25.326, ISO/IEC 27001:2022 and PCI-DSS require, and we turn each requirement into concrete controls and audit evidence.

From strategy to operations

The same team designs your security governance, tests your defenses with penetration testing and monitors your infrastructure from the SOC. No hand-offs between vendors and no reports that nobody implements.

ORGANIZATIONS THAT TRUST US

BANKING, FINANCE AND INSURANCE	Itaú, Banco Galicia, Banco Municipal de Rosario, Banco Rioja, BIND Banco Industrial, Banco Supervielle and more.
RETAIL, CONSUMER GOODS AND FOOD	Mercado Libre, Norauto, ServiCompras, Almundo, Megatlon, Plateanet and more.
INDUSTRY, ENERGY AND AUTOMOTIVE	Raízen, Pan American Energy, Caterpillar, Volkswagen, Toyota Tsusho Argentina, FV and more.
TECHNOLOGY, IT AND TELECOMMUNICATIONS	KIU, InvoiNet, Practia, Samconsult, Be Smart, Advertmind and more.
GOVERNMENT AND EDUCATION	Poder Judicial de San Juan, Superintendencia de Seguros de la Nación, Gobierno de San Luis, Correo Argentino, ORT Argentina, Universidad Católica de Santa Fe.

SERVICES

From strategy to operations

The same team designs your security governance, tests your defenses and monitors your infrastructure. Full details at bsit.com.ar/en/services.

Cybersecurity Operations Center (SOC)

8×5 monitoring with AI-assisted detection: we filter out 94% of false positives and detect threats in 6 minutes.

- Event source integration into a SIEM (Wazuh, Elastic or your existing platform)
- AI-assisted detection and false-positive tuning
- Incident triage, escalation and containment guidance

Penetration Testing and Security Assessment

We simulate real, controlled attacks on your applications, networks and cloud to find what an attacker could exploit.

- External pentest of the perimeter and Internet-facing services
- Internal network and Active Directory pentest
- Web application and API pentest (OWASP Top 10)

Alignment with International Security Standards

Gap analysis, implementation and internal audit for ISO 27001, BCRA "A" 7724, CNV, PCI-DSS and law 25.326.

- Gap analysis against the chosen standard
- Risk-prioritized remediation plan
- Policies, procedures and statement of applicability

Cloud Strategy

Secure AWS and Azure architectures: we review your cloud configuration, identities, encryption and monitoring.

- Security review of AWS accounts and Azure subscriptions
- Secure architecture design for migrations
- Identity, privileged access and encryption management

IT Risk Analysis

We identify your critical assets, rate their risks and deliver a prioritized treatment plan.

- Information asset inventory and classification
- Threat and vulnerability identification
- Risk rating by likelihood and impact

Business Continuity Plan

Business impact analysis, continuity and disaster recovery plans, with testing and training.

- Business impact analysis (BIA)
- Business continuity plan (BCP)
- Disaster recovery plan (DRP)

Security Management

Security governance, function outsourcing, awareness, identity management and supplier audits.

- Security governance and function outsourcing
- Awareness training and phishing simulations
- Security mystery shopping

Cyber Fraud Advisory

We investigate fraud, data leaks and unauthorized access while preserving digital evidence for legal proceedings.

- Digital evidence preservation and chain of custody
- Forensic analysis of devices, servers and logs
- Incident timeline reconstruction

Consulting Services

Business-aligned IT governance, COBIT-based process improvement, solution selection and PMO.

- IT governance structure design
- IT planning, budgeting and forecasting
- Solution assessment and selection

IT Staffing

Cybersecurity, audit and IT governance specialists for your team, backed by our partners.

- Security and SOC analysts
- Compliance and risk consultants
- IT auditors

STANDARDS AND REGULATIONS

Local regulation, international standards

We turn each requirement into concrete controls and the evidence auditors and regulators ask for.

ISO/IEC 27001:2022 · BCRA "A" 7724 · CNV · PCI-DSS · Law 25.326 · ISO 22301 · COBIT · OWASP

MANAGED SOC

Monitoring with AI-assisted detection

8×5	94%	6 min
operating coverage	false positives filtered	mean time to detect

OUR GOALS

Protect the digital assets that are essential and critical to organizations.

Risk management, continuous monitoring and incident response.

Create value in information technology.

Improvements in IT operations, governance and processes.
